

STIX Diabetes Programs HbA1C Guideline

Background: STIX Diabetes Programs is a place where all children are accepted and we foster a community of **S**upport, **T**radition, **I**nformation and **X**-citement across all our camps and programs. Part of living up to the mission is all staff members being good role models for campers; both in personal contact and in diabetes management. The healthcare providers in this community are dedicated to the year-round health of campers, counselors, and all staff who are part of the STIX Diabetes Family.

Practice: All camp staff will have a maximum HbA1c of 10 or a recent decrease of 4 or more percent leading up to camp. The Camp Leadership Teams reserve the right to execute these guidelines as appropriate.

If you are concerned this will exclude you from camp, please contact the Medical Director for your specific Camp:

- Camp STIX campstixmash@stixdiabetes.org
- Camp TWIG camptwigsmash@stixdiabetes.org
- Adventure Camp adventurecampmash@stixdiabetes.org

We are ALL here to help you live your healthiest life!
